

Govt Polytechnic College, Kaduthuruthy (First Outreach Workshop)

I am Preetha P, working as Lecturer in Electronics in Polytechnic Colleges for the past 19 years. Currently I am working at Govt Polytechnic College, Kaduthuruthy. I am the class tutor of Final year Electronics students and also in charge of campus placements and trainings.

The final year Electronics class consists of a group of 39 bubbly cheerful students who give life to the campus but at the same time restless too. They are talented, good at heart but reluctant to study the subjects. With their eagerness to question every thing they pose many challenges to Principal as well as their teachers.

To motivate them and to have self awareness, a training program based on NLP was arranged and it was conducted by Smt.Jayasree M, on 1st February 2019. Three faculty members including me participated in that programme. After the session itself the change was very much visible. The students who used to yell at every thing became so calm. In the afternoon she offered individual sessions to many who needed guidance. One of my students, who was going through a lot of turmoil with issues such as campus politics, relationship problems etc, said that he was getting relieved from all the problems and his mind became peaceful.

The very next week an Electronics company came for placement and all the students who have no back papers ,(Seventeen of them) got selected, a thing which is unheard of , in the recent past, in polytechnic community. After one month when I collected their feedback they said they feel a positive change ever since the program.

On behalf of my students and my personal behalf I express my sincere gratitude to Smt.Jayasree M. and wish her every success to lighten up many lives .
